SUBJECT: SECURITY INVESTIGATIONS OF INDIVIDUALS

SUBJECTS TRAVELING ABROAD

It is the impression of this office that agents generally, throughout the field, handle travel cases as such and tend to overlook the security matter aspects of these investigations.

It frequently occurs that when a subject is known to travel abroad, the agent to whom the case is assigned immediately prepares a letterhead memorandum incorporating the travel information, the highlights of the subversive information available from the file, and a physical description. Washington Field is requested to check for passport information and to submit letterhead memorandum. Once the travel information is resolved, the agent makes a determination as to whether the subject should be interviewed upon his return. In a number of cases, a reason will be furnished for not interviewing the subject and the case closed. In so doing, the agent may technically rely on a provision in 87D of the Manual of Instructions, Page 38, (7) (b) "No security investigation of an individual shall be closed unless the subject is included in the Security Index or consideration given to interviewing him. (Underlining supplied)

In preparing letterhead memoranda, it is the practice of the field not to state every item of subversive information. For example, if a subject is an active CP member, the agent does not itemize the subject's membership activities in CP fronts. This reasoning carries over to other less important cases. For purpose of brevity, the agent will state the principal subversive information and disregard other. In most of these cases on individuals not on the Security Index or the Reserve Index, no photograph of the subject is immediately available. In view of the celerity accorded the preparation of the initial letterhead memorandum, the agent does not make it a practice to contact security informants. Quite frequently, additional names for

NY

the subject together with the photograph are supplied by WFO. Understandably, but incorrectly, the agent assumes that he is no longer concerned with the security aspects of the case once he has outlined same in the original letterhead memorandum. Indices of other offices where subject has resided are sometimes not checked. These cases are often closed by letter or airtel with a recommendation that the subject not be interviewed. In these situations, the Bureau has not been apprised of all of the subversive information available on the subject and no real effort has been made by the field to develop information that was not immediately available when the case was opened. It is noted that the Manual of Instructions, Section 87D, Page 47, Item (d) provides, "When, at conclusion of investigation, subject's name is not being recommended for Security Index set out a brief summary statement in the cover pages accompanying closing report showing reasons for decision." This instruction applies only to reports. There is no similar instruction pertaining to cases which are closed by means other than report.

Especially with regard to youths who travel behind the Iron Curtain, it is felt that this travel, when taken into consideration with other subversive information in the file, warrants more investigation than is generally being accorded.

It is, therefore, suggested that the Manual of Instructions be amended to provide that when an individual on whom there is subversive information travels behind the Iron Curtain, an investigative report incorporating the travel information and a full scale security matter investigation must be submitted to the Bureau.

It may be that this requirement should be limited to those individuals normally regarded by the CP as youth.

It is suggested also that the Manual of Instructions on Page 38, cited above, be amended to read, "No security investigation shall be closed on a Security Index subject until consideration has been given to interviewing him."

It is also suggested that the Manual citation appearing on Page 47 be amended to read, "When, at the conclusion of investigation, the subject's name is not being recommended for

NY

the Security Index or Reserve Index, a brief summary statement should be set out in the appropriate communication closing the case the reasons for the decision. Although these suggestions, if adopted, will increase the work of the field, it is believed that they will insure sounder investigations and also insure that the Bureau will handle its responsibilities with respect to youth investigations.

In offering these suggestions, New York does not intend to indicate that it is permitting travel cases to be closed without adequate investigation. It is merely suggesting that the closing of some gaps in the Manual provisions may redound to the Bureau's benefit field wide.

SECURITY INVESTIGATIONS OF INDIVIDUALS

Reference is made to your letter dated August 16, 1962.

The observations in your letter have been given careful consideration at the Bureau and certain amendments are being made in Section 87D of the Manual of Instructions in efforts to more clearly define the Bureau's responsibilities with respect to investigations of individuals traveling abroad. Specifically, an addition is being made to Item (c), page 33a, outlining the necessity for a full and complete evaluation of all subversive information concerning individuals traveling abroad with a view toward determining whether additional investigation is warranted as well as a specific requirement that comments concerning such be furnished the Bureau in non-Security Index cases when the Bureau is advised of proposed travel of one of these subjects.

The Bureau has carefully considered your recommendation that a full-scale security matter investigation be conducted when an individual on whom there is subversive information travels behind the iron curtain. It was felt that the adoption of this suggestion would expand to a considerable degree our investigations in this field, noting, for example, that certain organizations such as the "National Guardian" annually organize tours behind the iron curtain with many of the participants being individuals against whom we have nebulous subversive information such as past membership in the International Workers Order. As you are aware, the standards for opening security investigations as set forth on pages 22 and 23 of Section 87D of the Manual of Instructions are broad and offer the field a wide latitude. These standards should be taken into careful consideration with a view toward opening investigation whenever it is determined that a subject with a subversive background intends to travel abroad. It is believed that the amendment referred to above will insure that such is done.

8-24-62

Letter to New York
Re: SECURITY INVESTIGATIONS OF INDIVIDUALS

546 - You recommended that the Manual of Instructions be amended to provide that no security investigation be closed on a Security Index subject until consideration has been given to interviewing him. The current requirement that all Security Index subjects previously interviewed with Bureau authority be reinterviewed on an annual basis or the Bureau advised of reasons for not reinterviewing the subject was adopted as the result of recommendations made by Conferences in the Spring of 1956. These interviews, as you are aware, may be conducted in most instances under SAC authority. It is recognized that no specific requirement that other Security Index subjects be considered for interview on a periodic basis exists; however, the Manual does state that consideration should be given to interviews with active subversives. This requirement should be borne in mind in connection with all Security Index cases.

In accordance with your recommendation, the Manual is being changed to require a brief summary statement in any communication closing a case listing reasons why a subject's name is not being recommended for the Security Index. This is not being extended to the Reserve Index because of the limited number of Reserve Index A subjects and the fact that action with respect to adding a subject's name to Section B of the Reserve Index is handled solely in the field.

Your observations and suggestions concerning this matter are appreciated.

SECTION 87D, MANUAL OF INSTRUCTIONS

Add the following sentence to Item (c) which appears as paragraph 1 on page 33a:

In non-Security Index cases all available data regarding subject's subversive activities and affiliations should be carefully evaluated with a view toward determining whether a full security investigation should be conducted and the communication transmitting data regarding a subject's travel should contain a statement as to whether a security investigation is being initiated and, if not, reasons therefor.

UNITED STATES GOVERNMENT

Memorandum

TO : Mr. ...

DATE: August 21, 1962

FROM : Division Streamlining
Committee

SUBJECT: SUGGESTION NUMBER 114-63

SUGGESTION

General
Suggester states that inasmuch as the Bureau is aware of a deleted Security Index (SI) subject's employment at the time of his deletion from the SI, it is felt that the Bureau, at that time, is in a position to determine if a subject warrants inclusion in the Reserve Index (RI) A. It is recommended that in all cases where the subject's employment indicates he warrants inclusion in the RI-A, the Bureau notify the office of origin that the subject has been deleted from the SI, is being placed in the RI-A and the RI-A cards are being forwarded to the office of origin.

Current Practice or Rule

Section 87D, 7, b, (10), (g), II and III, Manual of Instructions, (Page 62), requires that upon deletion of a subject from the SI, based solely on the application of SI criteria, his SI card containing descriptive data be retained and filed in the RI. At this time, consideration is to be given as to whether subject should be included in the RI-A, and, if so, a FD 122a is to be submitted to the Bureau.

Claimed Advantages

Suggester notes that adoption of this suggestion would eliminate the necessity of the preparation of the FD 122a by the office of origin and thus result in a saving of agent and stenographic time as well as resulting in more expeditious handling of these cases. A FD 122a must receive Bureau approval. It would seem feasible to have the subject's RI status determined at the Bureau at the time of subject's deletion from the SI. It would appear that this would result in a considerable saving of time at the Seat of Government.

Recommendation of Special Agent in Charge

Special Agent in Charge states that suggestion would result in a saving of agent and stenographic time and is worthy of consideration.

3089

Memorandum to Mr. . . .
RE: SUGGESTION NUMBER 114-63

VIEWS OF STREAMLINING COMMITTEE, DOMESTIC INTELLIGENCE DIVISION

The matters dealt with by this suggestion are the exclusive responsibility of the Subversive Control Section and, therefore, there are being set forth below the views and recommendations of that Section in which the Streamlining Committee of the Domestic Intelligence Division concurs.

Background

The suggestion pertains to Section A of the RI. The RI is comprised of individuals with subversive backgrounds not meeting the SI criteria but who in a time of national emergency are in a position to influence others against the national interest. The RI is broken down into two sections, A and B, with A containing the names of those individuals who in time of national emergency are in a position to influence others against the national interest or are likely to furnish material financial aid to subversive elements due to their subversive associates and ideology.

Reasons for Recommendation Against Adoption of Suggestion

(1) It would place the entire responsibility of determining whether an individual should be included in RI-A upon the Bureau in those instances in which the SI card is being cancelled. This is a function and responsibility of the office of origin and should be handled by that office.

(2) The office of origin is in possession of the complete and entire file on its security subject and is in a better position to determine the influence of an individual with subversive ideologies. The agent to whom the case is assigned in the field is familiar with many minor details of the subject's activities which are not available in Bureau files and, therefore, is in a better position to make a recommendation with respect to RI-A status. There would be instances in which a review of the Bureau file would not necessarily indicate that a subject's name should be included in Section A as opposed to Section B. For example, one criterion deals with "other potentially influential persons on a local or national level." The field division being familiar with a particular community or the activities of a subject in social or civic organizations and having more detailed information in its files concerning the subject's activities would be in a better position to assess an individual's capability to possibly influence numerous individuals in the event of a national emergency.

Memorandum to Mr. :
RE: SUGGESTION NUMBER 114-63

(3) This suggestion would increase the work at the Bureau by requiring the preparation of a letter to the field whenever a subject's name is being deleted from the SI advising of the Bureau's decision with respect to his RI status. At this time field recommendations for SI cancellation are handled by the return of a copy of the field letter stamped "Security Index card cancelled."

(4) The adoption of the suggestion would make more cumbersome the mechanical procedures involved in deleting a subject's name from the SI and/or placing his name in RI-A.

It is currently the practice in many of the field offices to submit a Form FD 122a recommending the inclusion of the subject's name in the RI-A concurrent with the submission of a recommendation that the subject's name be deleted from the SI. This facilitates the handling of the matter and involves very little additional effort on the part of the field in the preparation of Form FD 122a.

Alternate Suggestion

As an alternate suggestion it is proposed to make it a requirement that the field submit Form FD 122a whenever it recommends the cancellation of an SI card and the facts in the case indicate that his name should be included in Section A of the RI.

RECOMMENDATIONS:

(1) That the suggestion as stated not be adopted.

(2) That the alternate proposal set out above be adopted.
If you agree there is attached a proposed manual change.

ADDENDUM OF TRAINING AND INSPECTION DIVISION,

, 8/30/62.

Training and Inspection Division concurs with Domestic Intelligence Division in recommending against adoption of this suggestion. A basic rule of our operations fixes the responsibility for the investigation and administration of a case upon the Agent to whom the case is assigned in the office of origin. This suggestion deviates from this rule in that suggester proposes that a determination should be made at Seat of Government rather than by office of origin as to whether an individual deleted from SI is to be placed in the RI-A. The office of origin is in a much better position to make this determination than is the Seat of Government.

RECOMMENDATIONS:

1. That this suggestion not be adopted. On approval, no further action is necessary with regard to the suggester as he was thanked by prior letter.

2. As a means of facilitating the procedure decided by the Domestic Intelligence Division with regard to the handling of individuals considered for inclusion in the RI-A, it is recommended that the attached manual revision be approved.

August 21, 1962

PROPOSED MANUAL CHANGES
SECTION 37D, MANUAL OF INSTRUCTIONS

page 61: Add the following as a third paragraph under Item (g).

Letters recommending removal of a subject's name from the Security Index should be accompanied by Form 10-122a in cases in the case where the inclusion of subject's name in Section A of the Reserve Index.

The present paragraph 3 under Item (g), page 61, beginning: "Although these subjects will in fact be removed...." should be deleted and the following substituted therefor:

The following procedures should be followed in the case of those individuals not being recommended for inclusion in Section A of the Reserve Index.

SUBJECT: SECURITY INVESTIGATIONS OF INDIVIDUALS

We presently require the field to promptly advise us upon receipt of any information indicating that a subject of security interest is traveling abroad or intends to travel abroad in order that such information may be brought to the attention of the State Department, the Central Intelligence Agency and appropriate Legal Attaches.

New York letter of August 16, 1962 (attached), suggests that in the case of individuals not on the Security Index (SI) or Reserve Index, the Agents in attempting to immediately comply with Bureau instructions concerning notification of proposed travel and in furnishing a summary of the subversive information against the individual may be overlooking the security aspects of the case once the appropriate communication has been directed to the Bureau concerning the proposed travel. New York notes that these cases are often closed by letter or airtel with a recommendation that the subject not be interviewed.

#179-43 New York suggests that the Manual of Instructions be amended to provide that when an individual on whom there is subversive information travels behind the iron curtain, an investigative report incorporating the travel information and the full-scale security matter investigation be submitted to the Bureau.

OBSERVATIONS:

Outright adoption of this suggestion would expand to a considerable degree our investigations in this field. For example, the "National Guardian" annually organizes tours behind the iron curtain and many of the participants are individuals against whom we have nebulous subversive information such as past membership in the International Workers Order. This would expand our standards for opening cases in the security field which are set out in detail in the Manual. To insure, however, that Agents handling these matters

Memorandum to Mr.
Re: SECURITY INVESTIGATIONS OF INDIVIDUALS

do not "overlook" cases in which we should conduct complete investigations, it is proposed to make a Manual change requiring the field prior to closing one of these cases to advise specifically whether further investigation is warranted or is being conducted on the basis of available facts.

FD-132

New York suggests that the Manual of Instructions be changed to read: "No security investigation shall be closed on a Security Index subject until consideration has been given to interviewing him."

OBSERVATIONS:

It has been a requirement since June 18, 1956, that the field reinterview all Security Index subjects previously interviewed with Bureau authority prior to the submission of annual reports or set forth a statement in the cover pages to the report outlining the specific reasons why an interview was not being conducted. These interviews are conducted under SAC authority. While there is no specific requirement that other Security Index subjects be considered for an interview on an annual basis or the Bureau advised of reasons why such is not done, the Manual does state that consideration should be given to interviews with selected individuals active in subversive organizations for development of additional informants. It is not believed that New York's suggestion with respect to the change should be adopted.

81-63

3) New York notes that the Manual now provides that "When at conclusion of investigation subject's name is not being recommended for Security Index, set out a brief summary statement in the cover pages accompanying closing report showing reasons for decision." New York notes that this instruction applies only to reports and suggests that it be broadened to include cases which are closed by means other than reports.

Memorandum to Mr. _____
Re: SECURITY INVESTIGATIONS OF INDIVIDUALS

OBSERVATIONS:

The adoption of this suggestion would insure that the appropriate attention had been given by the field as to whether the facts in the case warrant Security Index consideration and its adoption is recommended.

ACTION:

1. If you agree there are attached appropriate Manual changes.
2. There is also attached a letter to the New York Office acknowledging receipt of its letter of August 16, 1962.

PROPOSED MANUAL CHANGES
SECTION 87D, MANUAL OF INSTRUCTIONS

Add the following sentence to Item (c) which appears as paragraph 1 on page 33a:

In non-Security Index cases all available data regarding subject's subversive activities and affiliations should be carefully evaluated with a view toward determining whether a full security investigation should be conducted and the communication transmitting data regarding a subject's travel should contain a statement as to whether a security investigation is being initiated and, if not, reasons therefor.

Item (G), page 47, reading "When at the conclusion of investigation subject's name is not being recommended for Security Index, set out a brief summary statement in the cover pages accompanying closing report showing reasons for decision." should be deleted and the following substituted therefor:

When at conclusion of investigation subject's name is not being recommended for Security Index, a brief summary statement should be set out in the appropriate communication closing the case showing reasons for the decision.

SUBJECT: DELINQUENCY IN SECURITY INVESTIGATIONS

SYNOPSIS:

Each month we follow the field closely on the status of security work by analyzing the backlog of pending cases and delinquency in espionage, internal security, security matter and foreign intelligence cases in classifications 65, 100 and 105. Status of these cases as of August 31, 1962, is set forth below.

In August, there was a decrease in pending active matters in the entire field in the security classifications from 18,718 to 18,542. Delinquent matters decreased from 1,679 to 1,516. The percentage of delinquent matters decreased from 8.9% to 8.1%.

Letters are being sent to the offices indicated by asterisks on page four herein, commenting on their delinquency and pointing out the necessity of bringing their security cases to a current status.

RECOMMENDATION:

The field will continue to be followed closely regarding security delinquency and you will be advised of the results of the review of the September, 1962, administrative reports.

Memorandum for Mr.
Re: DELINQUENCY IN SECURITY INVESTIGATIONS

DETAILS:

The August, 1962, administrative reports from all offices indicate that the total pending active matters in classifications 65, 100 and 105 decreased from 18,718 to 18,542. Delinquent items decreased from 1,679 to 1,516. The percentage of delinquent items decreased from 8.9% to 8.1%.

CUBAN EMERGENCY PLANS
INTERNAL SECURITY - CUBA

The following is a brief resume concerning our program with regard to Cuba in the event of hostilities with that country.

We have placed 219 dangerous pro-Cuban individuals on the Security Index. Of that number, 20 are aliens and could be apprehended on the basis of deportation warrants. The remainder would immediately be placed under close observation by the FBI.

We are also prepared to place Cuban diplomatic officials assigned to the United Nations and their dependents in protective custody upon receipt of appropriate instructions to do so from the Department of State.

CUBAN EMERGENCY PLANS
INTERNAL SECURITY - CUBA

This memorandum is in response to the Director's inquiry as to what study and plans have been developed regarding handling of the Cuban problem in case of hostilities with Cuba. We have specific programs covering such eventuality.

By SAC Letter 60-54, dated 11/22/60, we established a special program to keep track of dangerous individuals of pro-Castro affiliations, activities or sympathies. Such persons are placed on our Security Index. and, as of 9/24/62, 57 individuals (including 13 Cuban aliens) were so included. In addition, we have specially tabbed 162 other individuals, such as communists, et cetera, who are on the Security Index but who also have shown pro-Cuban sympathies. Thus, we can immediately segregate a total of 219 individuals who are considered dangerous, who are actively or sympathetically avowing the cause of Castro.

In the event of hostilities with Cuba, the Government would immediately proceed to pick up those of the 219 who are aliens. a total of 20 (the 13 Cuban aliens, plus two aliens of other countries who are among the 162 specially tabbed). We keep the Immigration and Naturalization Service informed concerning these aliens, and the Attorney General could issue deportation warrants against them, thus enabling them to be picked up.

Relative to the remainder, our program requires that, in the event of hostilities with Cuba, instructions will go immediately to our field offices to expand the coverage of each subject to the extent necessary to neutralize his dangerousness to this country.

With reference to Cuban diplomatic personnel, it is noted that the Cuban Mission to the United Nations is the only Cuban diplomatic establishment in the United States. On 2/15/62 we sent our New York Office 20

copies, in the Spanish language, of the protective custody warrant which FBI Agents would serve on Cuban officials when specified by the Department of State. Upon notification by the Department of State, Bureau Agents, together with a State Department official, would proceed to the United Nations and take these Cuban officials into protective custody. As of 9/1/62 there were seven Cuban officials and four dependents at the Cuban Mission. These officials would then be taken to their residences, where they would pack such belongings as they could carry and would be taken to a detention center designated by the State Department. Following the initial pickup by Bureau Agents, they would be turned over to Immigration and Naturalization Service agents for transport to the detention center and handling thereafter.

The present Attorney General has been advised of all phases of our Security Index program and the program to place officials of enemy nations in protective custody. By letter 2/1/62 the Attorney General was advised that Cuba was included with the Soviet-bloc nations under the possible internment program. We have not, however, specifically raised the question with the Attorney General as to action to be taken against Cuban officials and other pro-Cuban individuals considered dangerous in the event of hostilities with Cuba alone.

RECOMMENDATION: SI subjects sympathetic to communist China.

It is recommended we send a brief note to the Attorney General, specifically pointing out that, in the event of hostilities with Cuba, we have presently 219 pro-Cuban dangerous individuals on the Security Index; that 20 of these are aliens and could be apprehended on the basis of deportation warrants; that the remainder would be placed under close observation by the FBI; and that we would be prepared to place Cuban officials and their dependents in protective custody upon proper instructions from the Department of State. A letter to the Attorney General along these lines is attached for your approval.

THE CUBAN SITUATION

By memorandum 9-26-62 Mr. [redacted] has suggested that it may be we should relax our present standards whereby we list Cuban nationals for arrest in the event of war with Cuba in order that we may secure greater protection from sabotage activities in the event of hostilities. The Director commented, "Most certainly."

Background

There are two categories of pro-Castro Security Index subjects concerning whom we would take appropriate action in case of Cuban emergency:

(A) Individuals placed on Security Index solely on basis of their pro-Castro activities, connections, or sympathies;

(B) Individuals placed on Security Index for other reasons (such as members of Communist Party) who, by reason of pro-Castro activities, are considered dangerous in event of hostilities with Cuba and who are tabbed "Pro-Cuban."

Standards for including an individual on the Security Index based on pro-Castro activities or tabbing a Security Index subject as "Pro-Cuban" were set forth in SAC Letter 60-54 dated 11-23-60 (Memorandum 11-17-60 attached). These criteria call for the inclusion of persons who are clearly shown to be potentially dangerous based on a substantial showing of data within following standards:

(A) Leadership or prominent activities in pro-Castro group plus one or more of following activities in behalf of Castro regime: preparing or distributing propaganda, collecting funds, acts of violence, intelligence activity;

(B) Overt acts or statements establishing reasonable grounds for believing individual's loyalty would lie with Cuba in case of war.

140 In connection with individuals recommended for addition to Security Index, there must be a clear showing that there has been a continuing sympathy for aims and objectives of Cuban Government since 10-1-1960. This date is significant since, at that time, the Cuban Government had clearly and openly identified itself as being procommunist, pro-Soviet bloc and anti-United States.

Re: The Cuban Situation

Results of Positive Action Taken

Our systematic offense against pro-Castro individuals and groups in the United States has substantially neutralized organized activity on behalf of the present Cuban regime. We have caused Fair Play for Cuba Committee (FPCC) and July 26th Movement leaders to be brought before Grand Juries, have conducted widespread and penetrating interviews of their members, and have heavily infiltrated informants into their ranks. The FPCC was recently described to our Agents as merely a "translation bureau" by its erstwhile leader, Richard Gibson, who has since gone to live in Algeria. Only two of six top July 26th Movement leaders have not fled to Cuba; one of the two is an informant and the other is at complete odds with the small following left. In addition, a substantial number of the other rabid Castro supporters have decided it is too hot here and returned to Cuba.

Recommended Action

The effectiveness of the steps taken has undoubtedly silenced some of the Cubans here who remain basically in sympathy with Castro's aims. In view of this and in the face of the mounting Cuban crisis, we have carefully reappraised our Security Index standards and believe the following steps will prepare us for the special handling and isolation of others who may be threats to our security in the event of an emergency.

(1) Regarding individuals placed on Security Index solely by reason of pro-Castro activities, it is believed we should add an additional category; namely, Cuban nationals who, since 10-1-60, have by their statements or activities (verified by investigation) evidenced support of Castro or a communist regime in Cuba. We would be dealing here with persons who would be enemy aliens in the event of war with Cuba.

(2) Regarding the tabbing of current Security Index subjects as "Pro-Cuban," it is recognized that, as a practical matter, the overwhelming majority of the 11,243 (as of 9-14-62) subjects on the Security Index are pro-Cuban in outlook. Members of the Communist Party, the Socialist Workers Party or the Nationalist Party of Puerto Rico, for example, would obviously be sympathetic towards the revolutionary, communist and anti-American Castro regime, but it is not proposed that we tab all such individuals as "Pro-Cuban." To do so would in effect mean invoking the entire Emergency Detention Program in connection with a Cuban emergency.

What we propose to do is instruct the field that during their required review of cases on Security Index subjects (approximately 1000 are reviewed each month) they must consider recommending for pro-Cuban

tabbing all subjects who have in any manner demonstrated strong sympathy towards the Castro regime and who, by reason of their background, employment or activities, would pose a threat of sabotage or other disruptive activities in the event of Cuban hostilities.

Upon approval, we will promptly advise the Attorney General and the Internal Security Division of the Department of our revised standards.

By memorandum dated November 17, 1960, Assistant Attorney General [redacted] was advised that we contemplated adding certain individuals to the Security Index based on their potential dangerousness in the event of a limited emergency involving Cuba. The criteria to be used were outlined therein. In consideration of the mounting tension between Cuba and the United States, we are taking additional steps to insure that special handling will be given to other individuals who retain sympathies for the present regime in Cuba but whose activities did not fall within the previously established criteria.

Aliens of Cuban nationality and aliens holding Cuban citizenship will be considered for the Security Index when it is determined that one of these is (1) likely to foster, encourage, or promote the policies, programs, or objectives of the Cuban Government, or collaborate with the Cuban Government or (2) likely to engage in or attempt to engage in acts of espionage, sabotage or other activities inimical or detrimental to the defense or public safety of the United States as shown by overt acts or statements established through reliable sources, informants, or individuals.

Activities on a subject's part which are considered in determining whether his name should be added to the Security Index under the above would include (1) participation in organizations supporting the Castro regime, (2) participation in picket lines formed in support of the Cuban Government, (3) contacts with Cuban agents operating in this country on

There must be a showing of activities of the type described above subsequent to October 1, 1960.

To facilitate handling of "pro-Cuban" subjects added to the Security Index because of their organization affiliations or nationalistic tendencies, a new Special Section of the Security Index is being established and will carry the designation "Cuban." SUBJECT: SECURITY INDEX --

Instructions have been prepared providing for the establishment of an additional Special Section of the Security Index (SI) to include only those individuals whose nationalist tendency or organization affiliation is carried as "Cuba." This Special Section should be set up under the code "Cub."

In connection with the establishment of this Special Section, the field is being advised that amended SI cards are being forwarded under separate cover dealing with this category.

Instructions are also going to the field pertaining to subjects now tabbed "pro-Cuban" and the field is being told that a list of these subjects is being forwarded the appropriate field offices under separate cover.

RECOMMENDATIONS:

1) That the Statistical Section establish the Special Section of the SI as set forth above and furnish the Subversive Control Section a set of SI cards involving these subjects for referral to the field and for establishment in this Section.

2) That the Statistical Section prepare at this time a list by field office of those subjects presently tabbed "pro-Cuban" in order that this list may be made available to the field.

SUBJECT: DELINQUENCY IN SECURITY INVESTIGATIONS

SYNOPSIS:

Each month we follow the field closely on the status of security work by analyzing the backlog of pending cases and delinquency in espionage, internal security, security matter and foreign intelligence cases in classifications 65, 100 and 105. Status of these cases as of September 30, 1962, is set forth below.

In September, there was an increase in pending active matters in the entire field in the security classifications from 18,542 to 18,927. Delinquent matters increased from 1,516 to 1,638. The percentage of delinquent matters increased from 8.1% to 8.6%.

Letters are being sent to the offices indicated by asterisks on page four herein, commenting on their delinquency and pointing out the necessity of bringing their security cases to a current status.

RECOMMENDATION:

The field will continue to be followed closely regarding security delinquency and you will be advised of the results of the review of the October, 1962, administrative reports.

SUBJECT: SECTION 87 D, MANUAL OF INSTRUCTIONS,
CHANGES THERETO REGARDING PRO-CASTRO
INDIVIDUALS ON SECURITY INDEX

Memorandum Mr. to Mr. 10/2/62 advised that Manual changes would be submitted in connection with setting up new standards for inclusion of certain Cuban nationals on Security Index. Criteria for placing pro-Castro individuals on Security Index and tabbing others on index as pro-Cuban have been furnished to field in SAC letters 60-54 and 62-55. These Manual changes have been prepared and pertinent data set forth in above-mentioned SAC letters are incorporated therein.

RECOMMENDATION:

If you approve, attached changes will be made to Section 87 D, Volume III, Manual of Instructions.

Enclosure

October 10, 1962

PROPOSED CHANGES IN MANUAL OF INSTRUCTIONS

Section 87 D, Volume III, should be changed as follows.
Changes and additions are underscored:

Page 45. Following should be inserted as II and III under paragraph (3) (a). Present paragraph II of (3) (a) should be changed from II to IV.

II. Activity in support of Cuban regime.

Careful consideration should be given to recommending for inclusion in the Security Index those individuals who in the light of the clear identification of the Cuban Government as procommunist, pro-Soviet Bloc and anti-United States, would be deemed dangerous or potentially dangerous to the internal security of the U. S. in the event of an emergency involving Cuba and the U. S. In connection therewith, there should be a substantial showing of data within the following standards:

- (A) An individual has served as a leader or officer or has substantially participated in the activities of a pro-Castro organization and has engaged in activities which have included either the preparation or distribution of pro-Cuban or anti-U. S. propaganda; the active collection of funds for any agency or representative of the Cuban Government or for a pro-Castro group, which funds are not intended for the relief of human suffering or other charitable purposes; active participation in acts of violence against anti-Castro individuals or groups or against the United States; or the active collection of intelligence data regarding the national defense or the United States or which would serve the purposes of the Cuban Government as opposed to the interests of the United States, where there are reasonable grounds to believe that such data is to be or has been conveyed to any agency or representative of the Cuban Government.
- (B) An individual, whether he has participated in organizational activity or not, has engaged in one or more activities specified in (A) above and it has been clearly established, by overt acts or statements or other evidence, that there are reasonable grounds to believe the loyalty of the individual would lie with the Cuban Government in the event of armed conflict between the Cuban Government and the United States.

Enc 1

PROPOSED CHANGES IN MANUAL OF INSTRUCTIONS

(C) Aliens of Cuban nationality and aliens holding Cuban citizenship should be considered for the Security Index when it is determined that one of these (1) is likely to foster, encourage, or promote the policies, programs, or objectives of the Cuban Government, or collaborate with the Cuban Government or (2) is likely to engage in or attempt to engage in acts of espionage, sabotage or other activities inimical or detrimental to the defense or public safety of the United States as shown by overt acts or statements established through reliable sources, informants, or individuals. Activities on a subject's part which should be considered in determining whether his name should be added to the Security Index under the foregoing would include but should not be limited to (1) participation in organizations supporting the Castro regime, (2) participation in picket lines formed in support of the Cuban Government, (3) contacts with Cuban agents operating in this country on behalf of the Cuban Government or, (4) statements or activities on a subject's part establishing reasonable grounds to believe that his loyalty would lie with the Cuban Government in the event of armed conflict between the United States and Cuba.

(D) In connection with all individuals recommended for addition to the Security Index in consideration of the above-mentioned standards there must be a clear showing by overt acts or statements or other evidence, that there has been a continuing sympathy for the aims and objectives of the Cuban Government since October 1, 1960.

Since the courses of action which might be followed in the event of a limited emergency between Cuba and the U. S. would, in all probability, be different for aliens as distinguished from U. S. citizens it is imperative that the citizenship status of individuals recommended under criteria set forth above be clearly established.

III. Pro-Cuban activity.

All individuals now on, or subsequently added to, the Security Index under criteria set forth in paragraphs (3) (a) I, (A), (B), (C), (D) above should be tabbed as "Pro-Cuban" if their activities and sympathies have been such that they warrant special consideration in the event of a limited emergency involving Cuba and the U. S. This tabbing will include not only Cubans but also non-Cubans who

PROPOSED CHANGES IN MANUAL OF INSTRUCTIONS

have been engaged in substantial activities in furtherance of the aims and purposes of the Cuban Government, in support of pro-Castro groups or organizations or in furtherance of the communist or subversive infiltration of pro-Castro groups. To effect this tabbing submit Form FD-122 to the Bureau with the notation "Pro-Cuban" typed directly opposite the words "Miscellaneous (Specify)" in the space provided on the form. Attached to the form FD-122 should be an additional page containing a concise summary of facts which prompt the recommendation for this tabbing. These instructions in no way affect the character of cases under which subjects are currently being investigated. Security index cards sent to the field on such subjects will contain the capital letter "C" on the left side of the card at the beginning of the second line. These cards should not be kept in the "Cuban" Special Section of the index and those cards should be tabbed with a metal tab as mentioned in paragraph (11) (e) I., page 64, under tabbing of cards.

Line 4 of paragraph III., page 52, Section 87 D, should be changed to read as follows:

"stated. This section shall be broken down into seven"

The following should be added as paragraph (G) to paragraph III., page 53, under special section after present first two lines of page 53:

(G) Cuban
In order that, in the event of an emergency involving Cuba and the U. S., special handling may be afforded those subjects whose organizational affiliation or nationalistic tendencies are shown as "Cuban." Security index cards denoting such will contain the code "CUB" on line I.

Paragraph (11) (e) I., page 64, Section 87 D, under tabbing of cards should be changed as follows:

I. Tabbing of cards

No Security Index card is to contain tabs for any purpose other than to designate Detcom classification under foregoing provisions with the following exception. The alphabetical Security Index cards on those individuals designated as "Pro-Cuban" should be tabbed with a metal tab of a color different from those used to tab Detcom subjects.

FEDERAL BUREAU OF INVESTIGATION

October 5, 1962

WASHINGTON 25, D. C.

1. PERSONAL ATTENTION
SA LETTER NO. 62-55

UNRECORDED
10-5-62

RE: SECURITY INDEX - CUBA

SAC letter Number 60-54 established criteria for inclusion of individuals on the Security Index based on their pro-Castro sympathies and for the tabbing as "pro-Cuban" of other individuals already on the Security Index. In recognition of the mounting tension between Cuba and the United States, additional standards for placing individuals on the Security Index based solely on their pro-Castro activities and sympathies have been established to complement the standards outlined in SAC letter 60-54.

Aliens of Cuban nationality and aliens holding Cuban citizenship should be considered for the Security Index when it is determined that one of these (1) is likely to foster, encourage, or promote the policies, programs, or objectives of the Cuban Government, or collaborate with the Cuban Government or (2) is likely to engage in or attempt to engage in acts of espionage, sabotage or other activities inimical or detrimental to the defense or public safety of the United States as shown by overt acts or statements established through reliable sources, informants, or individuals.

Activities on a subject's part which should be considered in determining whether his name should be added to the Security Index under the above would include but should not be limited to (1) participation in organizations supporting the Castro regime, (2) participation in picket lines formed in support of the Cuban Government, (3) contacts with Cuban agents operating in this country on behalf of the Cuban Government or, (4) statements or activities on a subject's part establishing reasonable grounds to believe that his loyalty would lie with the Cuban Government in the event of armed conflict between the United States and Cuba.

There must be a showing of activities of the type described above subsequent to October 1, 1960, and this must be verified by investigation. In essence, these standards have been established to cover Cuban nationals who have definitely evidenced support of Castro or a communist regime in Cuba since October 1, 1960.

This move is being made to insure special consideration is given those potentially dangerous individuals who retain basic loyalties to the procommunist, pro-Soviet Bloc and anti-U. S. regime in Cuba but who have found it expedient not to engage in activities to an extent which would bring them within the previously proscribed standards.

Effective immediately no cases involving pro-Castro allegations against aliens of Cuban nationality and aliens holding Cuban citizenship are to be closed without consideration being given to whether the subjects thereof should be placed on the Security Index in keeping with this SAC letter. A statement showing why they do not qualify should be included on a cover page of the closing report or in other closing communication if the appropriate FD-122 recommending inclusion of the individual on the Security Index is not submitted. A systematic review of all Internal Security - Cuba and Registration Act - Cuba cases closed since October 1, 1960, should be conducted to select other potentially dangerous individuals who fall within these new criteria. Your 105-0 files and any other appropriate control files (such as those containing INS name check forms G-135a showing pro-Castro allegations have been made against Cuban aliens arriving in the U. S.) should also be reviewed.

Special consideration is to be given those individuals previously recommended for the Security Index but whose participation in organizational activities on behalf of Castro was not sufficient to come within the previously established criteria. Concerning those individuals whose investigative files show they clearly fall within the newly established criteria, it will only be necessary to verify their present employments and residences, submit a report containing this data and any unreported pertinent derogatory information, and forward FD-122 with accompanying succinct summary justifying recommendations for inclusion on the Security Index. In border-line cases where there are no concrete indications the individuals have clearly and unmistakably renounced their adherence to the policies of the present Cuban regime, their sympathies should be established by appropriate investigation, informant checks and/or checks with other reliable individuals in a position to know the individuals' true sympathies.

10/5/62
SAC LETTER NO. 62-55

In order that special handling may be afforded "pro-Cuban" Security Index subjects in the event of a limited emergency, each office should at this time set up a new category of the Special Section of the Security Index designated "Cuban." Existing instructions applying to the handling of Special Section Security Index cards as set forth on pages 52 and 53, Section 87 D, Manual of Instructions, should be adhered to.

The new "Cuban" Special Section will include all Security Index cards containing the identification "CUB," indicating Cuban organization affiliation or nationalistic tendency. In the immediate future Bureau will forward to each interested office amended Security Index cards designated in the upper right-hand corner "CUB" for this Special Section.

SAC letter 60-54 (F) provided for "pro-Cuban" tabbing of individuals carried on the Security Index for reasons other than their Cuban organization affiliations or nationalistic tendencies. The Security Index cards on such subjects are not to be placed in the new "Cuban" Special Section. In order that they may be readily identified, however, these cards in the Alphabetical Section of the Security Index should be tabbed with a metal tab of a color different from that used to tab "DETCOM" subjects. In the immediate future Bureau will forward to each interested office a list of those subjects whose names should be so tabbed. For your information, cards on such subjects contain the capital letter "C" on the left side of the card at the beginning of the second line.

Upon receipt of the foregoing amended cards and lists, all offices are to immediately verify the residences and employments of those Security Index subjects placed thereon on the basis of their pro-Castro activities as well as those other Security Index subjects tabbed "pro-Cuban." FD-122 showing changes should be expedited. Be certain arrangements are made to assure you are advised of any subsequent changes in their residences and employments.

All offices except Miami and New York should complete this review and advise the Bureau by October 31, 1962, as follows:
(1) Number of individuals being recommended for Security Index based on field office's evaluation that they positively fall within the newly established criteria; (2) Number of cases being opened or reopened to establish whether the individuals fit the new criteria; (3) Statement that residences and employments of all subjects placed on the Security Index based solely on their

10/5/62
SAC LETTER NO. 62-55

pro-Castro activities and all Security Index subjects tabbed "pro-Cuban" have been verified or a statement as to the number of such individuals whose residences and employments have not been verified and when this will be accomplished. Miami and New York should advise the Bureau by November 15, 1962.

With regard to the "pro-Cuban" tabbing of current Security Index subjects, the following procedure is to be effected immediately. During the annual review of all Security Index cases special attention must be given to each case and a determination made as to whether those who have in any manner demonstrated strong sympathies for the present Cuban regime have backgrounds, employments or special aptitudes which would make them potential threats to engage in sabotage or other disruptive activities should there be hostilities with Cuba. For example, those with certain specialized military training, those employed at key facilities, and those who have received training in police work or the use of explosives would warrant special consideration. FD-122 with succinct summary should accompany the annual report in each case where "pro-Cuban" tabbing is believed warranted.

FROM :

SUBJECT: SECURITY INDEX - *Bunk*

We forward to the field quarterly an alphabetical list of each office's Security Index (SI) in order that the SI cards maintained in the field may be checked and reconciled with Bureau records. The next list is due to be forwarded to the field following the running thereof by the Statistical Section October 15, 1962.

In conjunction with the reconciliation of the field's SI with Bureau records, we propose to again conduct a survey to classify each SI subject by occupation and type of product manufactured or service rendered. Previous surveys conducted along these lines were in October, 1953, and August, 1959. Periodic surveys of this type have proved valuable in affording us overall data regarding the concentration of dangerous subversion in the various phases of the industrial and economic life of the country. Through this data we are able to analyze the present penetration of communists in various occupational fields such as the teaching profession, the medical and legal professions, heavy industry, unions, et cetera. In the past we have found this type of information useful in our planning and programs.

This can be done at this time with little additional effort on the field's part.

ACTION:

If you agree, the occupational survey will be conducted in conjunction with the reconciliation of field records with Bureau records and appropriate instructions will be issued the field following running of the October 15, 1962, SI list.

SECURITY INDEX
TABULATION BY EMPLOYMENT

ReBulet to Albany captioned as above dated October 2, 1953. A copy of referenced letter was forwarded to the Jacksonville Office by Bulet to Albany dated July 17, 1959, and copies are enclosed for the Las Vegas and Tampa Offices.

The Bureau again desires that a survey be conducted to classify each Security Index subject by occupation and type of product manufactured or service rendered, this survey to be conducted in line with the instructions contained in relet.

Enclosed for each office is one copy of its Security Index list (two copies for New York). The information desired by the Bureau may be either typewritten or handwritten on the attached list. You will note that the attached list contains the subject's employment and in many instances the position held. Where both the position held and place of employment are shown, the only remaining factor to be noted on the list by you is the product manufactured or service rendered.

In addition, the attached list should be used to reconcile the Security Index in your office with the Security Index at the Seat of Government by checking the names on the list against the Security Index cards. Detailed instructions regarding this matter are contained in Bulet to Albany, copies to all offices, captioned "Security Index," dated April 24, 1961.

Offices having in excess of 500 Security Index subjects should complete this review and return the attached list within 15 days of receipt of this letter. The remaining offices handle within ten days..

NOTE ON YEL/OW: The above employment survey was recommended by dated 10-12-62 and approved, with the survey to be conducted in connection with the quarterly reconciliation of the MAIL ROOM ☒ TELETYPE UNIT ☐ field's SI with Bureau records. See memo (115) to , 10-17-62, captioned "Security Index".

**CUBAN EMERGENCY PLANS
INTERNAL SECURITY - CUBA**

Memorandum 9/25/62 in captioned matter pointed out we had specific programs to be instituted immediately in the event of hostilities with Cuba. This memorandum points up the action we have taken in order that we may be in a position to move immediately if hostilities develop.

By letter 9/26/62 the Attorney General was informed as to the number of dangerous pro-Cuban individuals who are carried on the Security Index. He was further advised of the fact that we are prepared to place Cuban diplomatic officials assigned to the United Nations and their dependents in protective custody upon receipt of appropriate instructions to do so from the Department of State.

By letter dated 10/3/62, the Attorney General was advised of the criteria which we would thereafter follow in placing aliens of Cuban nationality and aliens holding Cuban citizenship on the Security Index. These new criteria were circularized among the various field offices SAC Letter Number 62-55 dated October 5, 1962.

With regard to aliens on the Security Index, we have the current full name and residence and business address of each, and each field office covering an alien is under current instructions to keep informed of the whereabouts of the subject. By letter dated 10/18/62 we have advised the Attorney General to issue a deportation warrant on each such alien. Upon receipt, the original copies of all such warrants are to be sent to the field offices covering the aliens involved. In the event of hostilities, these warrants will be utilized by Bureau Agents to apprehend the aliens. Thereafter, the original warrants will be turned over to the nearest District Director of the Immigration and Naturalization Service and that Service will take over custody of the aliens. We have a proposed teletype prepared for the purpose of instituting necessary action to apprehend all such Cuban aliens on the Security Index, once the warrants have been received from the Attorney General, in the event of hostilities with Cuba.

With respect to all persons other than Cuban aliens on the Security Index tabbed as having pro-Cuban sympathies, we have a communication all prepared for transmittal to interested field offices for the purpose of issuing specific instructions with regard to the intensification of the coverage of such subjects.

With respect to our over-all emergency plans, we have a plan of action for internment enemy diplomatic, consular, United Nations and official personnel in the event of full-scale war. Following the break in relations between the United States and Cuba, the State Department proved for inclusion under such planning the official representatives of the Cuban Government. We have all such officials now in the United States identified and protective custody warrants, which would be served on Cuban United Nations officials by FBI Agents on instructions from the State Department, are in possession of New York Office. In addition, we have the floor plan for the space occupied by the Cuban United Nations establishment for use if apprehensions and searches there are to be carried out. In the event of limited hostilities involving Cuba and the United States, we are fully prepared to carry out all procedures under this particular program upon the request of the Department of State. In this connection, we have a proposed teletype for transmittal to the New York Office (there are no Cuban officials in this country outside those attached to the United Nations in New York City) issuing all necessary instructions with regard to handling Cuban officials under this program.

If censorship of mail and other communications is instituted in the event of hostilities with Cuba, we have certain subjects whose communications we would desire to have censored. These subjects include those currently on the Security Index with pro-Cuban tabbing, as well as an auxiliary list of other selected subjects which we maintain in a latent status.

SUBVERSIVE CONTROL SECTION
PROGRAMS AND ACCOMPLISHMENTS

Set out below is a brief resume of the programs and accomplishments of the Subversive Control Section covering the period October 16, 1961, to August 31, 1962.

Security Index (SI) maintained in current status. The names of 11,200 individuals contained in the SI as of August 31, 1962.

Reserve Index (RI) established in June, 1960. There are 1014 names included in Section A of the RI representing those individuals who are in a position to influence others against the national interests in time of an emergency and who should receive priority attention following apprehension of SI subjects. RI A cards maintained in up-to-date status at the Bureau and in the field. Cases reviewed annually. Following recommendations of the Internal Security-Espionage Conference June 29, 1962, a review of RI B cases was initiated to be completed over a one year period.

Dissemination responsibilities closely supervised to insure adequate discharge of our responsibilities. As example of the importance of prompt dissemination of information of interest to other Government agencies, information was recently developed indicating that the son of a subject of a security investigation had received an appointment at the Naval Academy at Annapolis. The results of our investigation were promptly furnished the Navy and the appointment was subsequently canceled.

Requests for informants for possible appearance as witnesses at various types of administrative hearings conducted by other Government agencies in connection with their security programs continues at a high level. During the above period we have made available to other Government agencies the identities of 176 potential witnesses.

The passport sanction of the Internal Security Act of 1950 making it a violation for a Communist Party (CP) member to apply for or use a passport became effective October 20, 1961. Fifty-two cases representing possible violations of the passport sanction have been

J- 31-62

Memorandum for Mr. . . .
Re: SUBVERSIVE CONTROL SECTION
PROGRAMS AND ACCOMPLISHMENTS

referred to the Department. All of the cases referred to the Department represent cases in which evidence exists of CP membership on the subject's part subsequent to October 20, 1961.

Nationalist Party of Puerto Rico and other pro-independence groups continue to receive intensified coverage. Counterintelligence moves directed against the Federation of University Students for Independence (FUPI) during 1962 has resulted in a curtailment of membership and funds of that organization as well as greatly decreasing its influence among the student population of Puerto Rico, particularly at the University of Puerto Rico.

Delinquency in Security Classifications 65, 100 and 105 averaged 8.2% with the average number of pending active cases in these categories at 19,256 cases.

Counterintelligence and Mass News Media material continued to receive close attention with 21 memoranda concerning 34 different individuals being submitted.

Employees Suggestions - 5 adopted

Personnel - As of October 15, 1961, the Section complement consisted of 21 Special Agent Supervisors and 23 clerical personnel. As of August 31, 1962, the complement consisted of 19 Special Agent Supervisors and 19 clerical personnel, a personnel reduction of approximately 13.6%. This reduction in personnel was accomplished although there has not been a corresponding reduction in the various factors by which the work load of the Section is measured, such as the mail count, pending active matters in the field, etc.

CUBAN EMERGENCY PLANS

ReBuairtel 10/22/62 captioned "Security Index - Cuba" and
SAC Letter 62-55 dated 10/5/62.

The identities of Cuban aliens being included on Security Index are being called to the attention of the Internal Security Division, Department of Justice. It is being suggested that Department consider making arrangements for the issuance of deportation warrants by Immigration and Naturalization Service (INS) in order that such warrants may be served on these Cuban aliens in event of a limited emergency involving the U. S. and Cuba.

Since current regulations specifically call for INS representatives to serve show cause orders at time of apprehension of aliens, the arrests and subsequent action taken against these Cuban aliens will be handled entirely by INS. In order to insure that sufficient data is available to sustain any future legal action, cases involving Cuban aliens currently on Security Index or those being considered for Security Index should receive continuous and

preferred attention. Intensive inquiries aimed at developing data showing that activities of these aliens fall within criteria set forth in SAC Letter 62-55 dated 10/5/62 should be initiated. Information that could become basis for deportation proceedings should not be overlooked. All phases of these cases, including check of sources and informants known to have been connected with Cuban activities, should receive exhaustive attention so that pertinent information may be made available to Department and INS.

Be certain any change in status of these individuals is promptly brought to the attention of Bureau, as future action is based on supposition that these individuals are aliens.

In those cases where Bureau has not been furnished information concerning current activities of those recommended for Security Index, current reports should be submitted to reach Bureau within 15 days of receipt of this communication.

SUBVERSIVE CONTROL SECTION
PROGRAM EVALUATIONPERIODIC REPORTS PROGRAM1. Origin

Annual reports in Security Index (SI) cases have been required since completion of the Summary Report Program 7-14-54 (New York Office 5-1-56). In certain type cases periodic reports were required at specified intervals for many years prior to 1954; i.e. key figures, top functionaries.

2. Purpose

To insure that current information is available to the Bureau in report form in order to keep the Bureau, as well as the Department, advised of the status of SI cases and in order to discharge our responsibilities of dissemination to other interested agencies in the executive branch of the Government.

3. Scope

All offices participate in this program.

4. Tie In with Other Programs

Closely related to the Emergency Detention Program, which deals with plans for the apprehension and detention of potentially dangerous individuals in time of an emergency.

5. Case Load

As of 10-15-62 there were 11,195 SI subjects, each requiring at least one report a year. Some of these cases require more frequent reports; namely (a) top functionaries, quarterly reports. There are 35 individuals considered as "top Functionaries." They represent the

11-7-62

Memorandum to Mr.
Re: SUBVERSIVE CONTROL SECTION
PROGRAM EVALUATION

highest degree of leadership in subversive organizations and their activities are constantly being followed. (b) Key figures - semiannual reports required in key figure cases presently numbering 557. These individuals represent leadership in subversive organizations on regional, district and state levels and we follow their activities closely.

6. Magnitude

This is a major program as evidenced by the fact that in all SI cases investigations must be brought up to date and reports submitted at specified intervals on all SI subjects. Under this program there would be approximately 12,000 separate reports submitted annually. This does not include investigations and reports on individuals currently being nominated for the SI.

7. Administrative Controls

Each Supervisor handling security matter cases utilizes a tickler system to insure that reports are submitted when due by the field.

8. Adequacy and Currentness of Instructions

Instructions dealing with this program are found in Section 87D of the Manual of Instructions. This Section of the Manual is up to date.

9. Over-all Value

Data dealing with this program is included in the budget material. In addition, this program enables us to thoroughly review the SI status of each individual subject on at least an annual basis. When information is developed clearly indicating that a subject no longer should be scheduled for apprehension, prompt action is taken to remove his name from the SI. Conversely, if the investigation develops evidence indicating that the subject presents a potential threat to the internal security in time of emergency, his name is included in the SI.

INTERNAL SECURITY - CUBA

Reference is made to my letter of November 5, 1962, in captioned matter.

Enclosed are two copies of a memorandum setting forth the names, home and business addresses of Cuban aliens who have been added to the Security Index. You may desire to arrange for warrants to be issued for these individuals by the Immigration and Naturalization Service in order that such warrants might be served on these aliens in the event of a limited emergency involving this country and Cuba. The names of other Cuban aliens will be furnished to you as they are added to the Security Index.

Reports covering the activities of these individuals have been furnished to the Records Administration Office and to appropriate District Directors of the Immigration and Naturalization Service.

It is requested you advise us of your decision regarding the issuance of warrants calling for the apprehensions of the individuals listed in the enclosed memorandum.

SUBJECT:

PROPOSED REVISION OF
FORMS FD-305 AND FD-305a

Captioned forms are used as the last pages to the cover pages of reports in Security Index and Reserve Index cases, respectively, and are utilized for the purpose of recording certain administrative data required in these cases.

SAC Letter 62-48 (E) captioned "Report Writing" dated September 11, 1962, eliminates the necessity for statements in reports to the effect that careful consideration was given to each source concealed therein and T symbols utilized only where identities must be concealed.

Item 5 of FD-305 and Item 6 of FD-305a contain a place for checking indicating that careful consideration was given to each source concealed by T symbols and T symbols were utilized only where necessary.

At the next printing of these forms, Item 5 of FD-305 and Item 6 of FD-305a should be deleted therefrom.

Item 1 of FD-305a contains a place for checking indicating that "Subject's name is being recommended for inclusion in Section A of the Reserve Index." This item should likewise be removed at the next printing as it is unnecessary. We utilize FD-305a only in those instances in which the subject's name is already included in the Reserve Index.

SUBVERSIVE CONTROL SECTION
PROGRAM EVALUATION

DELINQUENCY IN SECURITY INVESTIGATIONS

1. Origin

In March, 1952, the program of following individual offices on a monthly basis was initiated because of a then existing extremely heavy delinquency in classifications 65, 100 and 105.

2. Purpose

To stress the necessity of reducing delinquency in these categories and the necessity of maintaining these cases in a reasonably current status.

3. Scope

Field wide.

4. Magnitude

This is not a major program from the standpoint of manpower and cost.

5. Over-all Value

This program has resulted in a reduction in delinquency in security classifications and the maintenance of such delinquency in a fairly constant status during the past year. For example, the delinquency average since November, 1961, through October, 1962, in these classifications field wide stood at approximately 8.3 per cent. The highest delinquency recorded during this period was in May, 1962, (9.3%) with the lowest recorded delinquency being in October, 1962, (6.3%).

SUBJECT: DELINQUENCY IN SECURITY INVESTIGATIONS

SYNOPSIS:

Each month we follow the field closely on the status of security work by analyzing the backlog of pending cases and delinquency in espionage, internal security, security matter and foreign intelligence cases in classifications 65, 100 and 105. Status of these cases as of October 31, 1962, is set forth below.

In October, there was an increase in pending active matters in the entire field in the security classifications from 18,927 to 20,314. Delinquent matters decreased from 1,638 to 1,287. The percentage of delinquent matters decreased from 8.6% to 6.3%.

Letters are being sent to the offices indicated by asterisks on page four herein, commenting on their delinquency and pointing out the necessity of bringing their security cases to a current status.

RECOMMENDATION:

The field will continue to be followed closely regarding security delinquency and you will be advised of the results of the review of the November, 1962, administrative reports.

Memorandum for Mr.
Re: DELINQUENCY IN SECURITY INVESTIGATIONS

DETAILS:

The October, 1962, administrative reports from all offices indicate that the total pending active matters in classifications 65, 100 and 105 increased from 18,927 to 20,314. Delinquent items decreased from 1,638 to 1,287. The percentage of delinquent items decreased from 8.6% to 6.3%.

**SUBVERSIVE CONTROL SECTION
PROGRAM EVALUATION****SECURITY INVESTIGATIONS OF INDIVIDUALS****SYNOPSIS**

Bureau responsibility in this field originated with Presidential Directives, the first one in September, 1939. Purpose is to identify potentially dangerous individuals who are affiliated with subversive movements. This program is field wide and is closely related to the Emergency Detention Program, which involves plans for the apprehension and detention of potentially dangerous individuals in the event of an emergency.

From November, 1961, through October, 1962, there was an average of 19,179 pending active cases in classifications 65, 100 and 105. This Section's principal case load falls within the 100 classification and during the same period averaged 9,269 cases per month. Instructions are up to date and administrative controls exercised over the field by tickler system.

Other programs arise from security investigations of individuals and include interviews with subversives. We consider an interview in each case. The Security Index contains 11,195 names as of October 15, 1962. An average of 10 Fraud Against the Government cases per month have been opened since November, 1961. Requests for availability of witnesses from Coast Guard and Defense continue high. The identities of 220 potential witnesses were made available during the period October 16, 1961, through October 31, 1962.

DETAILS**1. Origin**

Presidential Directives, the initial one being issued in September, 1939, and since repeated on several occasions. These Directives charge the Bureau with the responsibility for investigation of individuals in the internal security field. It is the collecting

UNRECORDED
11-9-62

Memorandum for Mr. .
Re: SUBVERSIVE CONTROL SECTION
PROGRAM EVALUATION

agency of the entire executive branch for subversive information and has the responsibility of seeing that such information is distributed to those Government agencies having a legitimate interest therein.

2. Purpose

That identification and investigation of individuals who, because of affiliation with subversive organizations, may present a potential threat to the internal security in the event of an emergency and the development of evidence of violations of Federal statutes on the part of these individuals. If, during the course of a security investigation, it is determined that a subject does pose a potential threat to the internal security, he is scheduled for apprehension under the Emergency Detention Program by the inclusion of his name in the Security Index.

3. Scope

Field wide.

4. Tie In With Other Programs

Closely related is the Emergency Detention Program which deals with plans for the handling of individuals included in the Security Index in the event of an emergency. Also closely related are the various security programs of other Government agencies, such programs depending to a large extent on information developed by us and disseminated to such agencies.

5. Case Load

Basically, these cases fall in security classifications 65, 100 and 105. During the period November, 1961, through October, 1962, the average field case load in these classifications was 19,179 pending active matters.

The Subversive Control Section is primarily responsible for investigations of individuals under the 100 classification although we do have cases on individuals under the 105 classification, such as the affiliates of the Nationalist Party of Puerto Rico. During the 12-months' period November, 1961, through October, 1962, there was a

11-9-62

Memorandum to Mr. .
Re: SUBVERSIVE CONTROL SECTION
PROGRAM EVALUATION

monthly average of 9,269 pending active matters in classification 100 throughout the field.

6. Magnitude

This program is major from the standpoint of costs and man power and, as such, is referred to in the budget material.

7. Past or Present Weaknesses

Close attention is given the entire operations in this field in efforts to insure that we are fully discharging our responsibilities thereunder. Instructions are issued the field as needed and during the past year appropriate instructions have been issued dealing with the passport and employment sanctions as they pertain to Communist Party members provided by the Internal Security Act of 1950.

8. Administrative Controls

The field is followed closely on its over-all delinquency in the three security classifications mentioned previously. This is handled on a monthly basis. In addition, we follow the field by tickler on pending matters in the field of which we have knowledge and we follow the field for submission of periodic reports in Security Index cases to insure that such are submitted when due.

9. Adequacy and Currentness of Instructions

Instructions dealing with security investigations of individuals are contained in Section 87D of the Manual of Instructions and are in a current status.

10. Over-all Value

Determination of identities of individuals who should be apprehended in the event of an emergency in order to minimize possibilities of espionage, sabotage and subversion. Dissemination of information of intelligence value to other Government agencies concerning individuals and matters in which they have a legitimate interest. Budget purposes.

11-9-62

Memorandum for Mr.
Re: SUBVERSIVE CONTROL SECTION

OTHER PROGRAMS ENCOMPASSED IN AND/OR ARISING OUT OF
SECURITY INVESTIGATIONS OF INDIVIDUALS

SECURITY INDEX

As noted previously herein, one of the purposes of security investigations is to determine the identities of individuals who, because of affiliation with subversive organizations, may be considered a potential threat to the internal security in the event of an emergency. When such information is developed, the name of the individual concerned is included in the Security Index.

We presently have included in the Security Index names of 11,195 (as of October 15, 1962) individuals. Each Security Index case is thoroughly re-evaluated at least once annually at the Bureau and in the field to insure that the cases are sound in every respect should it be necessary to invoke the Emergency Detention Program. If it is found that the subject's activities no longer justify the retention of his name in the Security Index, immediate steps are taken to insure that his name is removed therefrom.

RESERVE INDEX

In June, 1960, the then Communist Index, maintained only in the field, was renamed the Reserve Index and a program of bringing the cases of individuals whose names were included therein up to date was instituted. We broke the Reserve Index into Section A and Section B. Section A contains a list of individuals who should receive priority consideration from the standpoint of investigation, interrogation or other action following implementation of the Emergency Detention Program. Section A cards are maintained at the Seat of Government and in the field. These cases are reviewed on an annual basis and brought up to date. We presently have included in

11-9-62

Memorandum to Mr.
Re: SUBVERSIVE CONTROL SECTION
PROGRAM EVALUATION

Section A of the Reserve Index the names of 1,047 (as of November 8, 1962) individuals. Section B cards are maintained only in the field.

Following recommendations of the Internal Security-Espionage Conference of May, 1962, a review of Section B Reserve Index subjects was undertaken on a field-wide basis, this review to be completed within one year.

DISSEMINATION - INCLUDING CHECKS FOR AVAILABILITY
OF INFORMANTS AND SOURCES

Security reports are disseminated to numerous interested agencies throughout the executive branch of the Government. By far the vast majority of such reports received are disseminated outside the Bureau. The responsibility of such dissemination necessitates careful and thorough evaluation of each report to assure that it is absolutely accurate both in form and content.

We are continuing to receive a heavy volume of requests from various departments of the executive branch of the Government for the availability of witnesses appearing in reports previously disseminated for appearance at hearings being conducted by such agencies as the Department of Defense and United States Coast Guard in efforts to remove subversives from access to classified data and/or restricted areas.

During the period October 16, 1961, through October 31, 1962, the identities of 220 potential witnesses were made available to these agencies for possible utilization at hearings.

CUBAN EMERGENCY PLANS
INTERNAL SECURITY - CUBA

This memorandum sets forth Bureau's position regarding apprehension of Cuban aliens on the Security Index in case of a limited emergency. In view of Department's ruling that Immigration and Naturalization Service (INS) must participate in apprehension of these aliens (as they are required to serve orders to show cause), we are leaving matter of apprehension entirely up to INS. Letter to this effect is being sent to the Attorney General and appropriate instructions are being issued to field.

By way of background, we wrote Attorney General on 10/18/62 concerning Cuban aliens on Security Index. We pointed out that in case of conflict with Cuba, activities of these individuals could be neutralized by their arrest on deportation warrants. We propose this be handled in same fashion as planned arrest of dangerous Chinese aliens during 1955 Formosan crisis; namely, that warrants be issued by Attorney General and served by Bureau Agents and that subjects arrested then be held for subsequent INS action.

Assistant Attorney General _____ of Internal Security Division later advised that current INS regulations (based on court rulings since Formosan crisis) require that orders to show cause be served on aliens by INS officer at same time or prior to service of deportation warrants. Yeagley proposed that undated warrants and orders to show cause be issued now by INS District Directors and, when occasion demands, that apprehensions be made jointly by INS and Bureau Agents. He inquired whether we would agree to this procedure. On Director's instructions _____ was told we preferred not to comment on this proposal and were leaving it up to Department. Department thereafter arranged to have INS Headquarters issue instructions to INS District Directors for issuance of undated warrants and orders to show cause for those Cuban aliens now on Security Index.

Re: CUBAN EMERGENCY PLANS

Director commented that since we had no authority, we should leave apprehensions up to INS.

We are, therefore, advising Attorney General that in view of advice received from , it is felt apprehensions should be handled entirely by INS. We will, of course, continue to thoroughly investigate pro-Castro Cuban aliens and, where appropriate, add them to the Security Index. We will also continue to promptly furnish INS with copies of our reports in these cases so that INS will have the benefit of all our investigation in case this program is invoked and INS is ordered to undertake the apprehensions.

ACTION:

Attached for your approval is letter to Attorney General with copies to Deputy Attorney General and Assistant Attorney General in line with the foregoing observations.

Reference is made to my letter dated October 18, 1962, which suggested that deportation warrants of arrest be issued for Cuban aliens on the Security Index and that these warrants be made available to this Bureau for service in the event of open conflict between the United States and Cuba.

In view of advice received from Assistant Attorney General J. Walter Yeagley on October 24 and 26, 1962, to the effect that current regulations called for the issuance of deportation warrants by District Directors of Immigration and Naturalization Service (INS) and for INS officers to serve orders to show cause prior to or at the time of the apprehension of an alien, it is believed that the apprehension of Cuban aliens under such a program should be handled entirely by INS. You may desire to make appropriate arrangements along these lines with INS.

We will continue to furnish appropriate local offices of INS reports covering the activities of Cuban aliens currently carried on the Security Index.

Memorandum to 10/17/52 approved plan to ask Attorney General to issue deportation warrants of arrest for Cuban aliens on Security Index, and for authority to issue Bureau Agents serve these warrants if hostilities break out between U. S. and Cuba. Complete names, home and business addresses of those involved have been obtained and letter is being directed to Attorney General requesting he execute such warrants.

A limited period of emergency resulting from hostile actions between U. S. and Cuba would not call for action against all individuals on Security Index. Dangerous Cuban aliens presently on Security Index could, however, be taken into custody on basis of deportation warrants of arrest. Similar action was planned in 1955 (during Formosan crisis) when deportation warrants were executed by the Deputy Attorney General and delivered to the Bureau for service by our Agents in the event of hostilities between U. S. and Communist China.

Since activities of these Cuban aliens on Security Index have been closely followed, Bureau is logical agency to effect their apprehension. Relevant reports have been furnished to the Internal Security Division and to other interested agencies including Immigration and Naturalization Service (INS). In event the Attorney General concurs with our plan and necessary warrants are issued, we will advise INS so that service will be responsible for final action taken against aliens involved.

With Cuban situation rapidly deteriorating, Bureau contemplates requesting Attorney General to authorize Bureau Agents to serve deportation warrants of arrest on Cuban aliens listed in Security Index if hostility should occur between U.S. and Cuba.

In order to be prepared for any eventuality in Cuban situation, we plan to ask Attorney General for authority to serve deportation warrants of arrest on Cuban aliens on Security Index, if hostilities break out between U. S. and Cuba. Appropriate field offices are being instructed to obtain full names and to verify addresses and employments of those Cubans involved.

With the situation rapidly deteriorating, possibility exists U. S. could be involved in hostile acts with Cuba. In the event of hostilities the Cuban aliens on the Security Index could be arrested by Bureau Agents on basis of deportation warrants of arrest issued by the Attorney General and then turned over to INS custody. Since we have been following activities of these individuals, Bureau is logical agency to handle such pickups.

Precedent for action of this type was established in 1955 when then Deputy Attorney General, executed deportation warrants of arrest which called for the apprehension of Chinese aliens on the Security Index. This took place during the Formosan crisis involving the U. S. and Communist China. Similar action appears to be most logical with regard to present Cuban situation.

To be certain we have up-to-the-minute data, we should contact field offices covering residences of those involved to get verification of their addresses and places of employment and for assurance that Bureau has their full and correct names. When this information is furnished the Bureau, we will make it available to Attorney General, pointing out prior precedent in 1955 crisis. We will request that Attorney General issue deportation warrants of arrest and that Bureau Agents be authorized to serve such warrants in event of open hostilities between U. S. and Cuba.

If you agree, attached airtel will be sent to appropriate offices calling for those offices to obtain aforementioned data.

Advice has been received from the Department to the effect that current regulations called for INS officers to serve show cause orders prior to or at time of apprehension of aliens in deportation matters. In view of this, Bureau has suggested to Department that any program calling for the apprehension of dangerous aliens during a limited emergency should be handled exclusively by INS. The foregoing, of course, does not relieve Bureau of its responsibilities in the event general emergency occurs and the Emergency Detention Program is placed into operation.

SUBJECT: SECURITY INDEX - General

We presently have included in the Security Index a group of individuals scheduled to receive priority attention in the event the Emergency Detention Program is invoked. Specific criteria is utilized in so scheduling these subjects and is based upon the degree of threat represented by the continued liberty of these individuals in time of emergency. These are referred to as "Detcom" subjects.

My memorandum of October 14, 1958, recommended that the field be required to state in the cover pages to incoming reports whether a subject's Security Index card is or is not tabbed Detcom and whether the subject's activities do or do not warrant such tabbing. It was further recommended that Form FD-305, which is utilized in Security Index cases as the last page of cover pages to reports to record certain administrative data, be amended to provide for merely checking blocks with respect to Detcom tabbing. The field was subsequently advised of the existence of these forms but was told that the forms should not be ordered until existing supplies were depleted.

During the course of the recently completed inspection of this Division, the Inspector noted that some offices continue to use the old FD-305 and that in some instances fail to make observations thereon concerning a subject's Detcom status. The Inspector suggested that the necessity of commenting upon this matter in cover pages to Security Index reports be reiterated to the field by SAC Letter.

SUBJECT: ~~DELINQUENCY IN SECURITY INVESTIGATIONS~~SYNOPSIS:

Each month we follow the field closely on the status of security work by analyzing the backlog of pending cases and delinquency in espionage, internal security, security matter and foreign intelligence cases in classifications 65, 100 and 105. Status of these cases as of November 30, 1962, is set forth below.

In November, there was a decrease in pending active matters in the entire field in the security classifications from 20,314 to 18,253. Delinquent matters increased from 1,287 to 1,435. The percentage of delinquent matters increased from 6.3% to 7.8%.

Letters are being sent to the offices indicated by asterisks on page four herein, commenting on their delinquency and pointing out the necessity of bringing their security cases to a current status.

RECOMMENDATION:

The field will continue to be followed closely regarding security delinquency and you will be advised of the results of the review of the December, 1962, administrative reports.

SUBJECT: SECURITY INDEX (C)

In connection with the inspection of the Domestic Intelligence Division, the Inspector suggested that consideration be given to the elimination of the 5 x 8 card index system maintained in the Subversive Control Section and at Quantico consisting of subjects' names who are included in the Security Index and Reserve Index-A and the substitution thereof of a detailed listing of the identities of these individuals by the Statistical Section on a monthly basis or on a more frequent basis if necessary. In suggesting this, the Inspector expressed the opinion that the elimination of these indices should result in a reduction of clerical personnel in this Division and possibly at Quantico.

The Security Index is the heart of our Internal Security Program. It encompasses a list of individuals subject to summary apprehension and detention in time of an emergency without recourse to courts. It must be entirely accurate at all times because of the above factor and meticulous attention is afforded this Index in efforts to assure that it is accurate and truly represents a list of individuals presenting a potential threat to the internal security of the Nation. The present card index system for this index has for many years proven to be entirely feasible, workable, and easily maintained in an up-to-date status on a day-to-day basis. The same is true of the Reserve Index-A which represents a group of individuals who should receive priority attention with respect to investigation, interrogation or other action following apprehension of Security Index subjects.

EX-105 REC-28
The set of Security Index cards and Reserve Index-A cards maintained at Quantico represent the only complete set outside of Washington, D. C., and were placed there for emergency use should under enemy action the Security Index at the Seat of Government be destroyed. It also represents a backup of field Security Index cards should they be destroyed by enemy action, and under such circumstances would be the sole guide of individuals to be apprehended under the Emergency Detention Program. The Executives Conference on August 10, 1954; September 13, 1954; and January 25, 1956, considered the question as to whether copies of reports on Security Index subjects should be stored at Quantico. It was concluded that the

Memorandum to
RE: SECURITY INDEX

cost and time involved would not be warranted as from an operational standpoint, the Security Index cards maintained there would permit the necessary action to safeguard the internal security of the country in the event of an emergency. For these reasons it would be absolutely essential to continue to keep this index in an up-to-date status on a day-to-day basis.

I feel that the elimination of the above indices and the substitution thereof of a monthly or even more frequent listing of Security Index and Reserve Index-A subjects by the Statistical Section is neither feasible, desirable, nor conducive to easy management, nor would enable a reduction in clerical personnel for the following reasons:

1. As the Inspector has noted, elimination of the card indices and substitution of lists thereof would require a supplemental record of changes not incorporated in the list. During the past year, monthly changes in these indices have approximated 1,050. Considerable clerical efforts would be involved in the Division in maintaining a supplemental record from month to month in sufficient detail as to readily identify any particular change made during the month. Further, to establish an absolutely accurate list at any given time, it would be necessary to suspend operations both in the Division and in the Statistical Section until all changes on hand at a given time had been processed and recorded on the IBM equipment.
2. Present system centralizes control for efficiency in insuring that the proper number of cards are sent to the field and accuracy of the information contained thereon. It provides for handling by personnel at all times under the direct responsibility of a Special Agent Supervisor trained in security work who can control and handle problems.
3. Any list compiled for the purpose of replacing the present Security Index card system would of necessity be in considerably greater detail than the present lists which are prepared on a monthly basis. For example,

Memorandum to
RE: SECURITY INDEX

the November 15, 1962, alphabetical list, although composed of 204 pages, contains a bare minimum of information listing only a subject's master name, race, sex, birth date, Bureau file number and office of origin. More than one list would have to be compiled, one setting forth the names of the individuals together with all the pertinent data now appearing on the Security Index cards, another list such as is presently prepared on a monthly basis for placing in the hands of the Department as we do not want to place a list containing detailed data appearing on the Security Index cards in the Department's hands. A third list would be necessary of all aliases and prepared in such a manner as to match up an alias with a master name. Based upon a check of 200 cards beginning at the first of the alphabet, it was found that there is an average of 2.57 aliases for each master name. This list in itself would be composed of approximately 39,700 names.

Under the present card index system, we are able to select within the Division from this index the identities of aliens of 40 different countries upon a moment's notice, as well as identities of individuals falling within six Special Sections of the Index and individuals employed in key facilities so designated by the Department of Defense. Should lists be substituted, an additional 47 lists would have to be run and supplements of changes made therein maintained from month to month if we are to accomplish what we presently can with the card index system. These lists would become extremely bulky, unwieldy, hard to work with and create considerable clerical effort in maintaining their current status.

4. Under present planning, the Security Index card is to be used as an administrative device to record apprehension in the event of an emergency. At that time expeditious handling will be essential and cards would be much more maneuverable than would the lists.

In summary, I cannot envision any alternate system from the one presently in existence which could be adopted at a savings in clerical personnel without loss of accuracy and control. This Division is responsible for the accuracy of the Security Index

Memorandum to Mr.
RE: SECURITY INDEX

although the field is specifically charged with the responsibility to likewise check the accuracy of Security Index cards upon receipt from the Bureau. This Division is also charged with specific responsibility for control of the Security Index Program and the implementation of the Emergency Detention Program in time of an emergency. Therefore, centralized control should be maintained within the Division and it is my definite feeling that it can best be accomplished by maintaining the present system.

RECOMMENDATION:

That the current system of card indices be continued.

*On considering all aspects of this
I am convinced the current
system is the best.*

ADDENDUM OF INSPECTION DIVISION

UNRECORDED

12/13/62

It appears that the Subversive Control Section could handle its normal work in an entirely satisfactory manner and at a saving in clerical personnel without maintaining these indices. The only persuasive argument for maintaining these cards here and at Quantico is the possible need for them in the event enemy attack should result in loss or inaccessibility of duplicate cards kept in the field. In view of the unpredictable nature of the conditions which might prevail after such attack, the Inspection Division feels it would not be justified in recommending elimination of these indices. It, therefore, recommends that the present system remain in effect.

SUGGESTION MEMORANDUM

ELIMINATION OF CARD INDICES FOR
SECURITY INDEX AND SECTION A,
RESERVE INDEX AT SEAT OF
GOVERNMENT IN FAVOR OF
SCHEDULES PREPARED BY DATA
PROCESSING EQUIPMENT

INSPECTOR: It has been observed that Domestic Intelligence Division (DID) maintains at Seat of Government a 5" x 8" card index of all Security Index subjects and all Section A, Reserve Index subjects. Alias cards are also included therein. It also maintains at Quantico similar indices for use in connection with the Emergency Detention Program in case of emergency. A considerable amount of clerical and supervisory time is spent in maintaining these indices.

It is also noted that alphabetical, geographical and special schedules are printed by the voucher - Statistical Section monthly and as otherwise required.

It would appear that a complete study of this situation would result in elimination of the afore-mentioned 5" x 8" card indices and a revision of the present schedules to serve the purposes presently served by the 5" x 8" cards. This should result in reduction of clerical personnel in the DID and possibly at Quantico.

A detailed study of the situation is suggested for submission to interested Bureau officials.

PRICE DESIRE OF METHOD
REASONABLY EFFICIENT:

1. At the Seat of Government and Quantico the Security Index is maintained on 5" x 8" cards as in field offices, except that the cards don't bear the descriptive data as is set forth in detail on the cards in the field. The same practice is followed with respect to Section A, Reserve Index. At present approximately 11,120 Security Index Master cards are on file at the Seat of Government. Approximately 1,683 Section A, Reserve Index cards are similarly on file. Alias cards are in addition to these numbers.

DOMESTIC INTELLIGENCE DIVISION INSPECTION
12/3/62

ENCLOSURE 1
- 3/30

2. During the year 11/1/61 through 10/31/62, 523 additions of cards for Security Index subjects have been made, 1,191 cancellations of cards for Security Index subjects have been made by withdrawing the cards from the file, and 19,302 cards have been placed in the file to replace out of date cards. This does not include the addition and deletion of cards of different color which are filed for each known alias of Security Index subjects. The number of such alias cards is not known but they far exceed the number of cards for subjects under their master names.

3. During the year 11/1/61 through 10/31/62 similar procedures have been followed with respect to the Section A, Reserve Index which has had 221 additions, 32 cancellations, and 360 changes.

4. To add subjects to either Index, the field makes recommendations which are referred to the Voucher-Statistical Section for such action if approved by the DID. The same procedure is followed when the field recommends cancellation of a card (removal of a subject) on file in the appropriate Index. The field also submits for the information of the Seat of Government changes in data to be recorded in the two Indices.

5. Supervisory personnel must personally approve additions to or cancellations from the two Indices. This is followed by transmitting to the Voucher-Statistical Section the new data so that 5" x 8" cards can be prepared by that Section and the new data can be stored in the data processing equipment.

6. Changes are likewise submitted to the Voucher-Statistical Section for preparation of new Indices cards and storage of the new data in the memory of the data processing equipment.

7. Changes to these two Indices are reviewed in the DID for accuracy (insofar as this can be determined without referring to the files of subjects) and to make adjustments to the data submitted so that it will fit the format of schedules and cards presently being used. This is primarily a clerical function. After review, the information is transmitted to the Voucher-Statistical Section, as mentioned above.

8. After new 5" x 3" cards are received from the Voucher-Statistical Section the accuracy of the work of that Section is checked by clerical employees, and old cards are filed in the SIO and at Quantico. (The set of cards at Quantico does not include the alias cards.) Cards for the field are transmitted by air to the field. For each card which replaces an existing card, the old card is withdrawn.

9. The SIO has the Voucher-Statistical Section prepare schedules of Security Index subjects once each month. These are alphabetical schedules, geographical schedules, and schedules for special purposes. These schedules are printed on 8 1/2" x 11" paper according to a definite format. All information now being printed on cards for subjects under their master names is not being printed on the schedules, addresses and some other data being omitted.

10. The field semiannually verifies for the SIO accuracy of these indices.

APPARENT OBSTACLES TO BE OVERCOME AND POSSIBLE SOLUTIONS:

1. Ready availability of information in additions, cancellations and changes to records should be as up to date as the information submitted by the field. Some personnel have questioned the advisability of eliminating the card indices in favor of a periodically-printed schedule because such a schedule would not be up to date due to additions, cancellations and changes received since the latest schedule was printed.

Elimination of the card indices and substitution therefor of a more complete schedule than is presently being prepared would require a supplemental record of the changes not yet incorporated in a schedule. This supplement could possibly consist of one thin white of the FD-122 or FD-122a or other communication received from the field which is the basis for the addition, cancellation or change. These could be filed temporarily in folders by first letter of subject's surname only and in chronological sequence as received. This would require a minimum of clerical handling but make them available for review if necessary. These temporary copies could be destroyed as soon as the next printing of the schedule is received because they would have been recorded therein.

Consideration would be given to the feasibility of printing the schedule more frequently if the supplemental record were to become unwieldy and frequent reference to it was necessary.

e. Re-evaluate categories of information needed on the basis of valid requests, keeping in mind that complete information is available in Bureau files and that the Field will be primarily responsible for possession and use of this information. Distinguish in this respect between what is desirable and what is essential.

f. Amend FD-122 and FD-122a to provide simple instructions in each block, as necessary, to assist the field in completing the form so that the information will be acceptable for introduction into the data processing equipment.

5. Present Duplans for the RDP provide that information be written on the back of the card at time of apprehension. Information re the apprehension is then submitted to the Voucher-Statistical Section for the purpose of keeping the memory of that equipment up to date.

Revised instructions can be issued for these notations to be made on the newly-devised schedule in an acceptable abbreviated form and in a uniform manner.

6. Confidence is expressed that the experienced and competent personnel of the BJO and the Voucher-Statistical Section can devise a suitable schedule which will eliminate the present system of hand-filed cards maintained at SOG and at Quantico for these two indices.

SUGGESTION:

It is suggested that a detailed study be prepared to outline advantages and disadvantages of eliminating the two 8" x 8" card indices and preparing printed schedule (S) to replace it. The study should be submitted to interested Bureau officials with appropriate recommendations.

ASSISTANT DIRECTOR

In accordance with the Inspector's suggestion, a detailed study of this matter will be conducted and appropriate recommendations submitted for consideration by interested Bureau officials.

(I) SECURITY INDEX -- Your attention is directed to Section 87D of the Manual of Instructions, page 78, in which is set forth a requirement that cover pages to reports relating to Security Index subjects must contain a statement as to whether or not the Security Index card in the case is tabbed DETCOM and a statement as to whether subject's activities do or do not warrant such tabbing.

Some instances have been noted recently in which no observations concerning this matter are contained in the cover pages.

The necessity of specifically commenting upon the DETCOM status of Security Index subjects in cover pages to reports should be reiterated at this time to all Agents engaged in security investigations. Destroy all outdated Forms FD-305.

Very truly yours,

SUBJECT: 0 SECURITY INDEX - General
TABULATION BY EMPLOYMENT

An analysis has been completed of the employment of Security Index subjects. The results of this analysis, which are set forth by fields of industry or service, are as follows:

- 1) Industrial, manufacturing and trade fields -- 4,285 -- 38.4%.
- 2) Professional and Cultural fields -- 2,410 -- 21.6%.
- 3) Students -- 245 -- 2.2%.
- 4) Labor unions (actual employment by the labor union) -- 187 -- 1.7%.
- 5) Subversive organizations and fronts -- 233 -- 2.1%.
- 6) Pacifist-type and racial organizations -- 16 -- .0014%.
- 7) Political and international organizations and domestic and foreign government establishments -- 164 -- 1.5%.
- 8) Miscellaneous (domestic service, odd jobs, housewives, individuals not gainfully employed, and retired persons) -- 3,625 -- 32.5%.

Attached is a chart representing a statistical breakdown setting forth specific areas of employment as obtained from the above analysis.

These statistics will not be current for any appreciable length of time inasmuch as the individuals studied in connection with this survey change employment frequently. RFC-54

SUBJECT: SECURITY INVESTIGATIONS OF INDIVIDUALS
FRAUD AGAINST THE GOVERNMENT

The purpose of this memorandum is to recommend that the New York Security Index list be checked by use of the Bureau's electronic data processing equipment against approximately 35,000 IBM cards presently maintained by the New York City Post Office for the temporary Post Office employees who worked during the 1961 Christmas Season.

If any Security Index subject is found among these 35,000 former employees, it would indicate a violation of the False Statement Statute, Title 18, USC, Section 1001, because the employee would necessarily have falsified his application with respect to subversive affiliation in order to get the job.

The Post Office Department has not made any name checks on these employees because of their large number, the short duration of their employment, and the fact that their positions are classified as nonsensitive. We have noted that Security Index subjects in large cities other than New York have been so employed. These violations have been discovered by our Agents in the course of their regular security investigations. In New York City this method is uncertain because of the large number of Security Index subjects and the large number of temporary Post Office workers. New York has not yet turned up with any such violations.

The New York City Post Office will furnish us the 35,000 IBM cards. The name and address on the cards can be compared electronically with the same information on the Security Index list and possibly identical persons located. Informal inquiry of the Voucher-Statistical Section indicates that this is feasible and can be done speedily and at negligible cost.

Our New York Office is being requested to ask the New York City Post Office to retain any applications for these employees until this check can be made. It is known that some of these applications have been destroyed. The application would be necessary to support prosecutive action, but even if the application for a Security Index subject has been destroyed, we would still be in a position to determine if such an electronic check would be feasible in the future.

Memorandum to Mr.
Re: SECURITY INVESTIGATIONS OF INDIVIDUALS

The New York postal authorities have been advised that the Bureau is not assuming any responsibility for checking Post Office applicants and that our interest is limited to discovering violations over which we have jurisdiction. Post Office personnel contacted concerning this matter will, of course, not be given any information concerning the Security Index.

RECOMMENDATION:

If approved, that the New York Office forward the IBM cards to the Voucher-Statistical Section for the purpose described above.

12/10/42
Since IBM cards available, no
furnishing necessary in Vouchers -

of running cards against our existing

negligible.

SUGGESTION			
<p>To institute the Detention Program, the <u>Security Index</u> cards will be distributed to individuals who are not familiar with the subjects. The Security Index cards contain the subject's true name and aliases, which in some cases are numerous. In some cases, the subject is more commonly known by one of his aliases rather than his true name and in some cases, he may be known by one name at his residence and another name at his employment.</p> <p>In order to eliminate any confusion in carrying out this program, it is suggested that in those cases in which a subject is more commonly known by one of his aliases that on the Security Index cards, adjacent to the subject's residence - type in "Known As (insert name known as at residence)" and adjacent to the subject's employment - type in "Known As (insert name known as at employment)".</p>

INTERNAL SECURITY - CUBA

Reference is made to this Bureau's letter of December 4, 1962, in the captioned matter. Enclosed are the original and one copy of a memorandum setting forth the names, home and business addresses and dates of the last reports concerning Cuban aliens who have been added to the Security Index. You may desire to arrange for warrants to be issued for the individuals by the Immigration and Naturalization Service (INS) in order that such warrants might be served on these aliens in the event of a limited emergency involving the United States and Cuba. The names of other Cuban aliens will be furnished to you as they are added to the Security Index.

Reports covering the activities of these individuals have been furnished to the Records Administration Office of the Department and to appropriate District Directors of INS. It is requested that you advise us of your decision regarding the issuance of warrants calling for the apprehension of the individuals listed in the enclosed memorandum.

SUBJECT: SECURITY INDEX - GENERAL
SUGGESTION #516-63 SUBMITTED BY
SA , NEW YORK OFFICE

SUGGESTION: In cases in which a subject is more commonly known by an alias, the Security Index (SI) card carry the additional notation "Known as _____ at residence" and "Known as _____ at employment," adjacent to these respective entries

OBSERVATIONS: Suggester feels this would prevent confusion in implementing the Emergency Detention Program since cards will be distributed to individuals who are not familiar with the subjects and sometimes a subject will be more commonly known by an alias than his true name.

The Domestic Intelligence Division commented that the instances under which the circumstances described by the suggester would occur are extremely limited; therefore, it was not felt the existing rules should be altered. The rule now requires that the full correct name of the subject and his aliases must be shown on the SI card. The full correct name is shown as the master name even though subject might be more commonly known by another name inasmuch as the warrants that would be issued under the Emergency Detention Program should be made in the subject's true name.

Two security index cards, one alphabetical, and one geographical, are maintained in a headquarters city. The geographical card is the one that will be used by Agents in effecting apprehensions. The reverse side of this card contains a detailed physical description and a photograph which are placed on it after receipt of the card from the Bureau. There would be no objection if a notation were made on this side of the card showing a subject's more commonly known name and good judgment would indicate this should be done. This could be handled easily in the field office without setting up additional data on the IBM equipment. It is noted that existing instructions (Section 87D, Manual of Instructions, page 50) permit the field to add any data to the reverse side of the geographical Security Index card which will assist apprehension.

The Training Division subscribes to the comments of the Domestic Intelligence Division and feels that the suggester should be so advised by letter with appropriate note for the SAC.

MEMORANDUM
RE: SUGGESTION #516-63

RECOMMENDATION:

That the New York Office be permitted to adopt the suggested procedure and the enclosed letter with appropriate instructions for the SAC be sent to the suggester. Receipt of the idea was acknowledged by prior letter.

ADDENDUM DOMESTIC INTELLIGENCE DIVISION 12/27/62

The instances under which the steps described in this suggestion occur are extremely limited; therefore, it is not believed that the existing rule dealing with the matter should be changed. The rule now requires that the full, correct name of the subject and his aliases must be contained on the Security Index card. The full, correct name is shown as the master name even though the subject might be more commonly known by another name inasmuch as the warrants that would be issued under the Emergency Detention Program must be made in subject's true name.

Two Security Index cards are maintained in Headquarters City: 1) the alphabetical card and 2) the geographical card. The geographical card is the one that will be utilized by the Agents in connection with effecting apprehensions. The reverse side of this card contains a detailed physical description and a photograph, all of which are placed on the geographical card in the field office following receipt of this card from the Bureau. There would be no objection to showing on the reverse side of this card the notation as to the subject's more commonly known name and a good judgement would indicate that this should be done. This can be handled easily within the field office without setting up additional data on the IBM equipment.

Existing instructions (Section 87D, Manual of Instructions, page 50) permits the field to add any data to the reverse side of the geographical Security Index card that will assist in effecting apprehension.

Dear Mr. Cashin:

Reference is made to your suggestion concerning the method used to list the names of Bureau subjects on certain index cards. I am pleased to advise you that there is no objection to the use of this procedure in your office and appropriate instructions to this effect are being directed to your Special Agent in Charge.

I want to thank you for giving me the benefit of your observations in this matter.

Present instructions in Section 87D, page 50, of the Manual of Instructions permit the field to add any data to the reverse side of the geographical Security Index card which will aid apprehension of the subject. There is no objection to the addition of the alias by which a subject is more commonly known, if appropriate, at his residence or employment. This may be done without the necessity of submitting FD-122s to the Bureau.

SUBJECT: DELINQUENCY IN SECURITY INVESTIGATIONS

SYNOPSIS:

Each month we follow the field closely on the status of security work by analyzing the backlog of pending cases and delinquency in espionage, internal security, security matter and foreign intelligence cases in classifications 65, 100 and 105. Status of these cases as of December 31, 1962, is set forth below.

In December, there was a decrease in pending active matters in the entire field in the security classifications from 18,253 to 17,997. Delinquent matters increased from 1,435 to 1,715. The percentage of delinquent matters increased from 7.8% to 9.5%.

Letters are being sent to the offices indicated by asterisks on page four herein, commenting on their delinquency and pointing out the necessity of bringing their security cases to a current status.

RECOMMENDATION:

The field will continue to be followed closely regarding security delinquency and you will be advised of the results of the review of the January, 1963, administrative reports.

Memorandum for Mr.
Re: DELINQUENCY IN SECURITY INVESTIGATIONS

DETAILS:

The December, 1962, administrative reports from all offices indicate that the total pending active matters in classifications 65, 100 and 105 decreased from 18,253 to 17,997. Delinquent items increased from 1,435 to 1,715. The percentage of delinquent items increased from 7.8% to 9.5%.

Mr.
Federal Bureau of Investigation

Dear Mr.

Security Investigation

I have received your suggestion that a particular item be added to the format of Form FD-154. You will be interested to know that due to the adoption of a previous proposal, this form has been revised in the manner you described. When the small amount of forms on hand is exhausted, office will begin receiving the revised form as orders are received.

Although action had already been taken in this regard, the interest and alertness which prompted you to bring this matter to my attention are indeed appreciated.

Sincerely yours,

L. Edgar Hoover

SA also proposed that a rubber stamp be authorized for the field's use until new supplies of amended Form FD-154 are received. Since this is an item of supply, you may order this stamp if you desire for use until revised forms are received by your office.

NOTE: Suggests the words "Defense Facility" with appropriate boxes marked "Yes" and "No" be incorporated on future printings of the FD-154. Further, that a rubber stamp be authorized for the field's use until new supplies of amended form FD-154 are furnished to the field.

Suggestion #381-63 submitted by SA Detroit Office, proposed same idea and was adopted. Form has been revised and will be furnished field as soon as small supply of old form is exhausted.

SUBJECT: SECURITY INVESTIGATIONS
OF INDIVIDUALS *© 1963*

We now have under investigation a number of Puerto Rican nationalist groups including the Nationalist Party of Puerto Rico. The activities of these nationalist groups have become so entwined that it is not unusual to have an individual connected with two or more of these groups at the same time and the individuals frequently change allegiance from one nationalist group to another.

These factors cause confusion in identifying the true character of the Puerto Rican nationalist cases particularly when running tabulations from Security Index punch cards and in routing incoming mail at the Bureau.

RECOMMENDATION:

It is recommended that for purposes of uniformity and to facilitate handling at the Bureau the character Internal Security - Puerto Rican Nationalist (IS-PKN) or Security Matter - Puerto Rican Nationalist (SM-PKN) be used in all future reports and correspondence relating to Puerto Rican nationalist groups and individuals affiliated therewith. SUBJECT: DELINQUENCY IN SECURITY INVESTIGATIONS

SYNOPSIS: *SECURITY INDEX - GENERAL*

Each month we follow the field closely on the status of security work by analyzing the backlog of pending cases and delinquency in espionage, internal security, security matter and foreign intelligence cases in classifications 65, 100 and 105. Status of these cases as of January 31, 1963, is set forth below.

In January, there was an increase in pending active matters in the entire field in the security classifications from 17,997 to 18,157. Delinquent matters decreased from 1,715 to 1,395. The percentage of delinquent matters decreased from 9.5% to 7.6%.

Letters are being sent to the offices indicated by asterisks on page four herein, commenting on their delinquency and pointing out the necessity of bringing their security cases to a current status.

RECOMMENDATION:

The field will continue to be followed closely regarding security delinquency and you will be advised of the results of the review of the February, 1963, administrative reports.

Memorandum for Mr.
Re: DELINQUENCY IN SECURITY INVESTIGATIONS

DETAILS:

The January, 1963, administrative reports from all offices indicate that the total pending active matters in classifications 65, 100 and 105 increased from 17,997 to 18,157. Delinquent items decreased from 1,715 to 1,395. The percentage of delinquent items decreased from 9.5% to 7.6%.

SUBJECT:

SECURITY INDEX - *Don*

My memorandum of January 28, 1963, recommended that for the purpose of uniformity, the character Internal Security - Puerto Rican Nationalist (IS-PRN) or Security Matter - PRN (SM-PRN) be utilized in future reports and correspondence relating to all Puerto Rican Nationalist groups and individuals affiliated therewith.

The approval of this recommendation necessitates changes in the Security Index cards and Statistical Chart prepared by the Voucher-Statistical Section.

ACTION:

1. That the Voucher-Statistical Section revise this chart which now reads NPR (designating Nationalist Party of Puerto Rico) and substitute therefor PRN.

2. Security Index cards for all subjects now designated "NPR" should be revised to show the designation "PRN" with copies of these cards being forwarded the Subversive Control Section for referral to the field.

3. We are in the process of identifying those subjects now carried under the designation "Miscellaneous" whose cards should likewise be tabbed PRN. This list of names should be forwarded to the Voucher-Statistical Section by separate communication for similar action.

SECURITY INVESTIGATIONS
OF INDIVIDUALS — and

An editorial entitled "Workingclass Anniversaries" which appeared on page 2 of "The Worker" dated February 5, 1963, commented on the anniversary of "The Worker" to be celebrated on March 8, 1963, at Carnegie Hall. The editorial urged all readers to use every day of the period prior to March 8 to bring together a sizeable contribution for presentation to "The Worker" at Carnegie Hall.

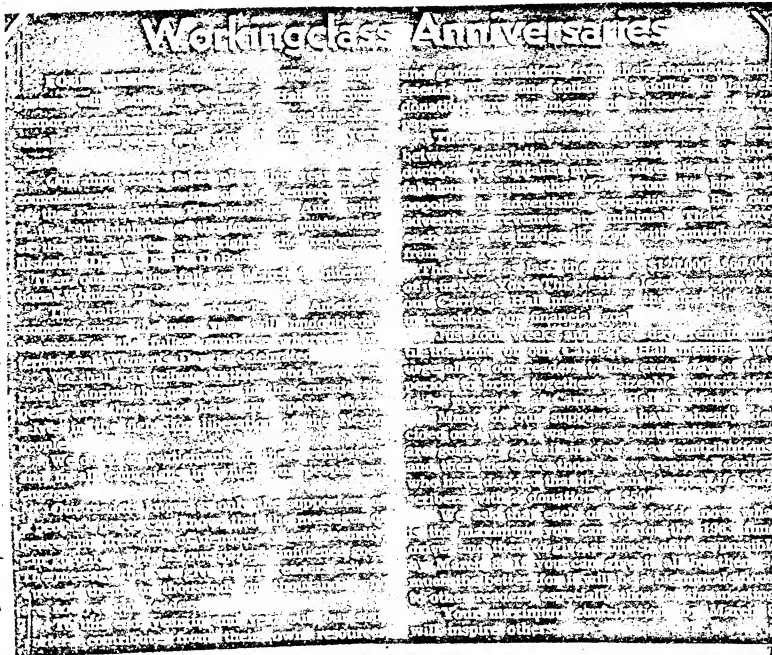

If you have not already formulated plans to completely cover this meeting, you should do so immediately. The Bureau feels that those previously unknown individuals who attend the affair and/or contribute to "The Worker" would be proper subjects for investigation. If individuals in attendance should already be known to you, placing them at the celebration, would, of course, be important evidence of their continued sympathy toward and activity in behalf of the communist cause.

As you know, the Bureau is disturbed by the fact that more than half of the estimated Communist Party (CP) membership in New York is unidentified. The Bureau believes complete coverage of this and all other communist meetings of this type would eventually lead to the elimination of many unidentified CP members.

63 Advise the Bureau within 15 days from the date of this letter what plans you have for covering "The Worker" anniversary meeting.

Memorandum

TO :

DATE: February 6, 1963

FROM :

SUBJECT: SECURITY INVESTIGATIONS
OF INDIVIDUALS

Following passage of the Internal Security Act of 1950, the Department of Defense compiled a list of key facilities which under the provisions of Section 5 of the Act members of a communist action organization are forbidden to hold employment in. This Section of the Act was to become operative only upon publication in the Federal Register of a list of such facilities. We received a list of the key facilities; however, Defense did not publish same as required in the Act. We have carried the added character "Internal Security Act of 1950" in individual reports on security subjects with communist affiliations employed in key facilities.

Following an amendment to the Internal Security Act of 1950 on May 31, 1962, which allowed Defense to post individually plants from which members of communist action organizations could not be employed without violating the terms of the Act, Defense posted approximately 3,600 plants listed as "defense facilities" and provided us with a complete list of such facilities. Although many of the previously mentioned key facilities have likewise been designated as defense facilities the two lists are not synonymous.

Employment in a key facility is not in violation of the Internal Security Act of 1950 unless the plant has likewise been designated as a defense facility pursuant to Section 5 of this Act. Therefore, the character "Internal Security Act of 1950" should no longer be utilized in key facility cases.

ACTION:

1. There is attached a proposed SAC Letter instructing the field not to use the character "Internal Security Act of 1950" in key facility cases unless such facility has also been designated as a defense facility pursuant to Section 5 of the Internal Security Act of 1950. The SAC Letter instructs that this added character must be utilized in the cases of subjects employed in defense facilities when their activities have been of a communist nature.

2. There are likewise attached proposed manual changes covering the above point as well as minor manual changes necessitated by the posting by Defense of defense facilities.

CUBAN EMERGENCY PLANS
INTERNAL SECURITY - CUBA

Memorandum to 1/23/63 advised 67 Cuban aliens were on Security Index (SI) as of that date. Since 1/23/63 five Cuban aliens have been added and four removed from the SI. As of this date 68 Cuban aliens are on SI. With regard to those removed, two returned to Cuba and recent investigation disclosed the others no longer meet current criteria.

In addition, Department instructed Immigration and Naturalization Service to obtain necessary documents calling for the apprehension of one, in the event of a limited emergency between the U. S. and Cuba. , an Irish national, was included on SI because of his pro-Castro activities. The action by the Department in this matter is result of Bureau request that Department consider authorizing issuance of warrants for non-Cuban aliens who could be a potential danger to this country in the event of hostilities with Cuba.

Investigations concerning Cuban aliens continue to receive prompt and vigorous attention.

RECOMMENDATION:

You will be kept advised of progress in this matter.
